Fast Cutting / Long Lasting

Best Value

C.A.R.B. Approved Al<sub>2</sub>O<sub>3</sub>

Color	White
Particle Shape	Angular
Hardness	9.2 mohs
Bulk Density	1.75 – 1.85 g/cm <sup>3</sup>
Specific Gravity	3.3 – 3.9
Moisture Content	< 0.8%
Free Silica	None

### Coarse 24 Grit

Aggressive abrasive grits engineered for tough jobs. Creates a deep profile; Coating and Scale removal, Surface Preparation, Monument Carving. 4 – 5 mil profile.

### Medium 36, 36/46, Grit

Medium abrasive grits for all around surface preparation. Combines an aggressive cut with a softer finish; Scale and Rust Removal, Surface Preparation for Painting and Coatings, Monument Carving. 2 – 4 mil profile.

### Fine 54, 80, 100 Grit

More refined abrasive grits for more polish and feathering; Light Scale and Rust Removal, Surface Preparation for Painting and Coatings, Monument Finishing, Stainless Steel and Aluminium Preparation. 1.5 – 3 mil profile.
